## Economical Temperature Control *JUMO ecoTRON*

COATESVILLE, PA – JUMO Process Control, Inc. recently introduced the JUMO ecoTRON, an economical temperature control unit that is highly suitable for applications in the heating, refrigeration and air conditioning industry.

The JUMO ecoTRON is available in two different mounting options: ecoTRON T for DIN-rail mounting and ecoTRON M in the size 76mm x 36mm for panel mounting. Both types are fully programmable through instrument keys and feature a clearly readable 3-segment LCD with symbols for °F or °C and symbols for heating or cooling cycles.

Acceptable analog inputs are RTD PT100 or Pt1000 or KTY21. The ecoTRON is able to detect a sensor failure and allows the user to configure the type of switching action desired in case of probe failure/break. Standard on the ecoTRON is a 10-Amp rated relay. Power supplies in 115 VAC, 230 VAC, 12 VDC, or 24 VDC are available.

Further outstanding features of the JUMO ecoTRON are:

- Defrost or Timer function
- Counter function, e.g. for counting the operation hours of the compressor
- Backlit LCD
- Protection IP65
