A Golden Opportunity Without a Golden Price Tag *JUMO MIDAS Pressure Transmitter*

COATESVILLE, PA – JUMO Process Control, Inc. recently introduced a new cost-efficient addition to its pressure transmitter line, the JUMO MIDAS Pressure Transmitter.

These new pressure transmitters for measuring relative (gage) pressure can be used in both liquid and gaseous media. They utilize a ceramic thick-film transducer that converts the pressure into a standardized voltage or current signal.

The principal advantage for the user lies in the particularly good compatibility of the aluminum-oxide (Al_2O_3) ceramic base material with a wide range of media, and the resulting long operational life of the instrument.

Thanks to the compact design, JUMO MIDAS pressure transmitters are outstandingly suitable where the installation space is restricted, such as in compressors, motors, etc.

The stable temperature response ensures precise measurement results (deviation $\leq 0.02(4) \% / ^\circ C$). The wide range of pressure connections and electrical connections that are available covers all typical application situations.

For complete information and technical specifications about the JUMO MIDAS, contact JUMO Process Control, Inc., 885 Fox Chase, Coatesville, PA 19320. Toll Free: 800-554-JUMO(5866); Telephone: (610) 380-8002; FAX: (610) 380-8009; Website: www.JumoUSA.com; Email: info@JumoUSA.com.
